# INFRALAN<sup>®</sup> Splicer

The innovative **INFRALAN<sup>®</sup> Splicer** has been specifically developed for Fttx and conventional splice applications. The slim design offers the user excellent **manoeuvrability** and **reliability**.

The **robust splicer** guarantees ultra-fast and effortless splicing. Each splicing process is made possible with the fiber holders 250µ in black, 900µ in blue and optional 900µ in red for loose tube cables.

User-friendly and intuitive menu navigation via **2.8" colour TFT display** and camera with **140x magnification**.

**Ultra-fast splicing time of only 7 seconds!**

## Reliability in all operating conditions

0°C - 45°C

max. 95% RH, non-condensing

Service life of electrodes up to 2200 splice processes

## Attractive service package

2-year manufacturer's warranty

Quick technical support

### Customized maintenance contracts

Get in use with the modular maintenance package which is customized to your needs.

# Complete set

INFRALAN®

With cleaver, stripping tool and splice protection

Suitable for every common shrink splice protection with max. length of 60 mm and a OD of 5 mm, also available separately

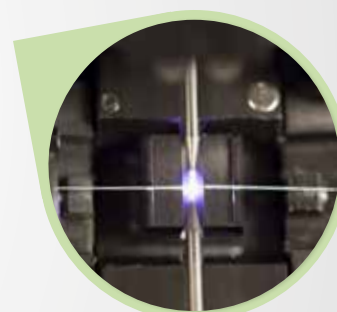

Complete set for immediate use, no other tools required

Easy to use  
2.8" colour TFT display  
Camera with 140x magnification

Fiber holder  
250  $\mu$  black  
900  $\mu$  blue

40 splices with one battery charge  
Splicing can be done whilst battery is charging

INFRALAN®  
**Splicer**

800 g,  
light-  
weight

(incl. battery)

230x98x53 mm
